Designed for life

Immersing yourself in the soothing, relaxing water of our spas is an experience like no other.

Whatever you're looking for, you're sure to find something to surprise you in the JD Spa range.

Our confidence comes from our years of experience in design and production technologies.

Our spas are made to suit your style. Add a little pleasure to your life and enjoy the benefits of air and water massage. Most of all, our spas are designed to last.

The unique nature of our products is clear from the moment you buy one, and of course when you take your first refreshing dip in your new spa.

Welcome your new JD Spa lifestyle.

Whenever you want, wherever you want

The JD Spa range is suitable for spaces of all types and is fully compatible with your environment and your lifestyle.

With a wide range of JD Spa options available, including a variety of different tanks and coverings, you can create the perfect spa to suit your space.

With our high-quality range, you can customise your spa and create an oasis of pleasure to stimulate your senses:

- Hydrosilence:
The first silent hydro massage system
- Aromatherapy system:
Releases invigorating essential oil aromas in the spa
- Music: Relaxing background music
- Chromotherapy:
Bathe your body in soothing light and relax your senses.

Timeless

You can enjoy your spa day and night in all seasons.

Simply set the perfect temperature and surrender yourself to the relaxing embrace of the water.

So you can enjoy the sun, the stars... or even the snow.

Take some "me time" and enjoy a relaxing hydro massage, wherever you are and whatever the weather.

Correct water treatment

The entire JD Spa range is fitted with a sophisticated system to ensure that the water is properly treated at all times, so you can be confident that your spa will always be safe, containing only pure, pleasant water.

All models are also fitted with a corona discharge system. This is the most reliable ozone production method and is designed to keep your water pure at all times. This system also reduces the need for water treatment chemicals, thereby reducing your maintenance costs.

How does the filtration system work?

The water in the spa passes through cartridge filters which filter out large-particle impurities. The filters are designed in such a way that all of the water in the spa passes through the skimmer, both during programmed filtration cycles and during the continuous water recycling process, ensuring that every drop of water is filtered.

Innovations

Our R&D team is dedicated to developing innovative technologies, to ensure that you get the very best spas available. The innovative features of this range are designed to improve your experience and minimise the need for maintenance.

Hydrosilence
The first silent hydro massage system: an all-round intense experience for the perfect "me time".

Hydro massage jet

Each model in the JD Spa range features a unique combination of jets, giving you a wide choice of massages. Ease tired muscles, relieve tension or simply relax. Our spas are ideal, whatever your requirements. All of our jets are fully adjustable, allowing you to choose the intensity of your massage while you stretch out and relax in your spa.

cluster

This jet provides an intense, direct and targeted massage.

cluster pulsator

A small, targeted, pulsating jet which releases water at variable intensity.

single roto polystorm

This jet releases a single stream of water to provide a targeted, rotating massage.

twin roto polystorm

Similar to the single roto jet but with two streams of water, providing a massage comparable to that of a professional masseur.

directional polystorm

A light jet at constant intensity.

massage polystorm

The inner section of this jet causes the water to move in a circular motion through each of the seven nozzles, providing an intermittent massage

directional powerstorm

The largest directional jet in the range, with a single stream of water which can be targeted at tense muscles.

twin roto powerstorm

Larger than the twin roto polystorm jet, this jet is more intense and covers a wider radius.

Ligne JD Spa

The JD Spa range has been designed with absolute comfort in mind. This exclusive range features the very latest innovations, offering a wide range of massage options and attractively-designed models.

JD Spa gives you the ultimate in pleasure, with an astonishing array of lighting combinations, water functions and stainless steel jets.

The seats and options are ergonomically designed, guaranteeing you an experience like no other.

Each and every part in the JD Spa range, from the shell to the hydraulic system, is covered by the guarantee and after-sales service agreement.

JD Cosy

This compact yet spacious spa can accommodate up to three people. The vertical seats are specially designed for complete immersion and an intense, invigorating massage. The reclining space provides an exclusive, full-body massage with a relaxing combination of powerstorm and cluster jets.

Specifications

Hydrosilence
The first silent hydro massage system: an all-round intense experience for the perfect “me time”.

Audio system ⁽⁸⁾
A fully watertight music player system, available as an option in two versions:
- AM/FM radio with CD player
- iPod/MP3 docking station with FM radio.

Twin roto polystorm ⁽¹⁾
Similar to the single roto jet but with two streams of water, providing a massage comparable to that of a professional masseur.

Cluster ⁽²⁾
This jet provides an intense, direct and targeted massage.

Directional polystorm ⁽³⁾
A light jet at constant intensity.

Air injectors ⁽⁴⁾
Air-only distribution system.

24/7 recycling
The water in the tank is continuously filtered and replenished by the recycling pump.

Mood lighting ⁽⁵⁾
A mixture of LEDs, light jets and waterfalls to create colourful light combinations and a relaxing atmosphere.

ABS plastic base ⁽⁶⁾
A robust, watertight base that can withstand all types of climate.

Pit drainage ⁽⁷⁾
This drainage system ensures that water can be removed simply and quickly, making maintenance easier.

Rigid cover
All spas come with a vinyl cover. It is made from polyurethane foam, which helps to insulate the spa from the elements.

Specifications

Aromatherapy ⁽⁹⁾
Circulates aromatherapy fragrances through the air blower circuit to complement your hydro massage.

Flow regulator ⁽¹⁰⁾

Water blade flow regulator ⁽¹²⁾

Dual control ^{(14) (15)}

All models in the JD spa range are fitted with a dual control panel, allowing you to adjust all positions even when you're in your spa, for the perfect, uninterrupted hydro massage!

Spa Frog ⁽¹¹⁾

Fully integrated chemical release system, linked to the 24/7 water recycling system.

Anti-vortex suction ⁽¹³⁾

Waterfall

The waterfalls are beneficial for both body and mind, creating a gentle bubbling sound and oxygenating the water, keeping the tank naturally clean in the process.

Microban filter

The system uses Microban antimicrobial technology, acting as an additional barrier in the filtration process. Microban protection prevents the growth of bacteria and mould.

Ergonomically-designed seats

The JD Spa range imitates the natural flow of water, with special ergonomically-designed seats that combine comfort with elegance and style.

With easy access, extra-wide edges and deep seats, the range offers the perfect mixture of technology and comfort.

Synthetic covering

The JD Spa range features injected resin coverings available in two colours. They are hard-wearing and long-lasting and require minimum maintenance.
